MySql	Redux	Git & Github	J Query	AJAX
HTML	Bootstrap	CSS		

Familiar With

OOPS Mongo Compass Postman Nginx

C programming   Java Figma AWS EC2

EDUCATION

BROTOTYPE   (Present)
MERN stack Developer Trainee
Intensive Self-Learning Platform (Tasks assigned and reviewed by industrial experts every week)

CIVIL ENGINEERING
B.E
Vivekananda college of Engg & Technology, Puttur

2014 - 2017

PROJECTS

SPORTSCLUB

Sportsclub is ecommerce web application I have created using Express.js, Node.js, mongoDB and handlebars. The project has two phases "User" and "Admin". The admin has the capabilities of managing the user, products and categories. The project is hosted in the domain named "sportsclub.world" by using the AWS and Nginx

🐙 Git repository

WORK EXPERIENCE

Lecturer in BIT Polytechnic,Inoli Manglore(2018-2022)

MINI PROJECTS

INCUBATION MANAGEMENT

Incubation management is a minproject done using react.js, mongodb and node.js. The project provides booking facility for the users and the booked slots are not available to other users.

OLX CLONE

Built a clone of olx by using react.js, Furthermore, used the firebase database and firestore for storing the data of the projects.

NETFLIX CLONE

Created a clone of netflix by using react.js, where I used the third party API of "TMDB" for displaying the movie details.

FEATURES IMPLEMENTED

- Otp verification
- RazorPay Integration
- coupon management
- Admin panel

REACH THE WORLD

REACH THE WORLD is a social media web application which is created using React.js, Express.js Node.js and mongoDB . It has the basic features like every social media apps. Moreover, maintained the MVC architecture in the project for improving the coding standard.

🌐 www.friend.reachtheworld.tech

FEATURES IMPLEMENTED

- JWT access token
- Admin panel
- Post section
- Follow Unfollow
- Realtime chat
- Forgot password
- Otp , resend otp

DECLARATION

I hereby declare that all the facts given above are true and correct to the best of my knowledge.
